

# Final Task

## Task Requirements Document

## Task Requirements:

Create your first **Tourism website**.

- Create Login ,Home, Touristic Places, and Contact us pages.
- User name that is logged with must appear in all pages in header dynamically.
- The header contains text or image as a logo, navigation bar and if you want to have a background image, please choose it to look good.
- The footer should have contact information and the copyright statement.
- The home page contains images, a carousel and some descriptions about the website.
- In the home page add Greeting/welcome statement that change dynamically every 3 second.
- The touristic places page should contain cards of the touristic places.
- The card contains an image, the name of the place, description, and button that links another website to read more about the place.
  - If the user hovers on the place name the font-size will increase.
  - If user clicks on description, more details must appear in the same card and welcoming voice must be heard.
  - If the user clicks on the image, it will change to this image:

- The contact us page contains the website contact information and a contact form (I expect from you a nice professional form). And when end user sends the form, a message in the DOM (not as pop up box) must appear that he/she send it successfully and make sure that the form is sent for once (not able to send more than one message)

## Notes:

- Don't forget to do the reset CSS.
- Use components from bootstrap.
- Don't use bootstrap templates.
- Feel free to add your creativity.
- Please do some research before you start and visit some tourism websites.
